

## I400 WBF system

## Options and accessories

Rack mounting terminal	Accessory modules
Stainless steel housing terminal	External coupler and communication interfaces
Remote display unit	Power box
Printer	Local control box with display unit

## I400 WBF Software for continuous dosing

**PRECIA  
MOLEN**  
WORLDWIDE WEIGHING

### Application

The I400 WBF software is the measuring and control device developed by PRECIA MOLEN for the continuous weigh belt feeders.

The system equipped with I400 WBF software can also replace any electronics of an existing installation operating with electronic strain gauge load cells.

Its software allows measuring and controlling a continuous product flow on doser type:

- ▼ Weighbeltfeeder belt, with mechanical lever and pivot points or, fully electronic.
- ▼ Screwfeeder screw.

It meets all the requirements of this application domain:

### Weighing function

- Weight and speed measurement,
- Automatic or manual zero request,
- Instant flow rate calculation,
- Average flow rate with adjustable time-constant,
- Partial or global totalizer,
- Minimum/maximum threshold management;

### Load pre-selection function

- Empty belt or loaded belt weighfeeder start up,
- A product quantity loading pre-selection manual entry or via the communication protocol,
- Data backup in a DSD (Data Storage Device).

### Dosing function

- Flow rate control according to a set-point coming from the PLC or tabulated on the terminal keyboard,
- Simple regulation mode and dual regulation mode,
- Multi-channel dosing : up to 5 weighfeeders per controller,
- Mixture control. This function allows composing and producing a recipe with variable ingredients proportion,
- Doser interlock control,
- Alarm management,
- Gravimetric or volumetric mode,
- Auto / Manual and restricted mode management.

### Printing function

- Company name on ticket header.
- Manual or automatic printing at programmable time interval,
- Automatic printing when reaching the weight set-point.

### USB key

- Configurable virtual printing to USB key.
- Backup / restore metrological parameters and feeder adjustment.

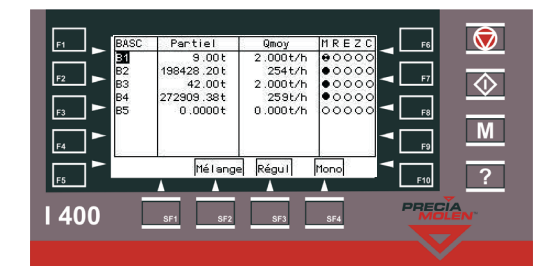

### Display

1. Stop of cycle.
2. Start of cycle.
3. Access to metrological data display.
4. Choice of access levels.
5. Multifunction keys F1 to F10 and SF1 to SF4 defined in the application and represented by an icon on screen.
6. Validation bar.

Up to 5 feeders can be supervised via the I400 terminal graphic display.

The F5 and F10 function keys allow selecting the data to be displayed in each column.

Multi-channel view

Example of a multi-channel display containing 5 dosers used for producing a mixture according to a recipe entered by keyboard or sent by a computer communication.

### Communication

#### Serial link

A PLC or a supervision system can be connected to the I400 WBF indicator by using the protocol:

- Modbus RTU through RS232 or RS485 serial link.

#### Field bus

The same systems can be connected to the native CAN OPEN interface used by PRECIAMOLEN via one of the following protocols:

- Ethernet TCP/Modbus
- PROFIBUS-DP
- EtherNet/IP via external PRECIA MOLEN coupler
- DeviceNET

## Communication protocol

### Output\* / dosing channel data

Data	access
Average flow rate	L
Alarm status	L
Status	L
General appearance	L
Regulator setting	L
Partial total	L

L: Reading  
\* PLC input

### Input\* / dosing channel data

Data	access
General appearance**	R/W
Recipe code**	R/W
Pre-selection**	R/W
Proportion**	R/W
Command**	R/W

R/W: Read/Write  
\* PLC output  
\*\* common outputs for all channels

### Status description

Local mode	Weigher On
Manual mode	Extractor ON
Slave mode	Command
Control in progress	HS command
Volumetric mode in progress :	Material coeff. b0
Pre-selection in progress	Material coeff. b1
Vibrator in operation	Unit
Zero in progress	Active recipe
Zero OK	Backup mode

### Command

Command	Action performed
0	Command acknowledgement
1	Doser in operation
2	Doser stopped
3	Pre-selection start up
4	Pre-selection stopped
5	Switching to Manual mode
6	Switching to Local mode
7	Switching to Slave mode
8	Fault acknowledgement
9	Erasing the current recipe
10	Partial total reset

## Alarm description

Addresses	Variables	Comments
b0	1: YES / 0: NO	Transmitter fault
b1	1: YES / 0: NO	Regulator fault
b2	1: YES / 0: NO	Loaded total reset fault
b3	1: YES / 0: NO	Batch reset fault
b4	1: YES / 0: NO	Belt On fault
b5	1: YES / 0: NO	Belt position fault
b6	1: YES / 0: NO	Decentred belt fault
b7	1: YES / 0: NO	Material fault
b8	1: YES / 0: NO	Average flow rate fault
b9	1: YES / 0: NO	Max. load fault
b10	1: YES / 0: NO	Max. threshold fault
b11	1: YES / 0: NO	Min. threshold fault
b12	1: YES / 0: NO	instantaneous flow rate fault
b13	1: YES / 0: NO	Speed fault
b14	1: YES / 0: NO	Min. load fault
b15	1: YES / 0: NO	Converter fault
b16	1: YES / 0: NO	Parameter fault
b17	1: YES / 0: NO	Sliding fault
b18	1: YES / 0: NO	Segmented tare fault
b19	1: YES / 0: NO	Zero fault
b30	1: YES / 0: NO	Grouped alarms
b31	1: YES / 0: NO	Emergency stop state

## Monitoring program

- ▼ Monitoring a production batch.
- ▼ Display the batch start date/time.
- ▼ Batch totalling.

## Description of inputs / outputs

### Digital output assignments per dosing channel

Function	Description
1	Zero in progress (BS)
2	Zero OK (BS)
3	Scale On (BS)
4	Extractor On (BS)
5	Maximum load fault (BS)
6	Minimum load fault (BS)
7	Zero fault (BS)
8	Batch reset fault (BS)
9	Belt fault (BS)
11	Flow rate fault (BS)
12	Weigher On (BS)
13	Extractor On (BS)
24	Transmitter fault (BS)
25	Converter fault (BS)
26	Parameter fault (BS)
27	Belt sliding fault (BS)
28	Segmented tare fault (BS)
29	Zero out-of-range (BS)
30	Local operation (WBF)
31	Manual operation (WBF)
32	Slave operation (WBF)
33	Maximum load fault (WBF)
34	Minimum load fault (WBF)
35	Belt acceleration (WBF)
36	Belt deceleration (WBF)
37	Extractor acceleration (WBF)
38	Extractor deceleration (WBF)
39	Vibrator (WBF)
40	Speed fault (WBF)
41	Average flow rate fault (WBF)
42	Control in progress (WBF)
43	Volumetric operation (WBF)
44	Material fault (WBF)
45	Belt centring fault (WBF)
46	Belt position fault (WBF)
47	Regulator fault (WBF)
48	Emergency stop
49	Doser ready

### Digital input assignments per dosing channel

Function	Description	Detail
101	Forcing operation in volumetric fault	<i>b1 b0</i>
		0 0 Slave
102	Operating mode selection b0	0 1 Manual
103	Operating mode selection b1	1 0 Local
		1 1 Local
104	Material coefficient selection b0	
105	Material coefficient selection b1	
106	Fault acknowledgement	
107	Proportion increment	
108	Proportion decrement	
109	Doser selection	
110	Belt centring fault	
111	Belt position fault	
112	Product presence	
113	Start	
114	Stop	
115	Batch reset	
116	Regulator fault	
117	Backup mode	

### Common digital input assignments to all channels

Description
Global line set-point
Global line set-point
Pre-selection start
Pre-selection stop
Emergency stop.
